EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michele Connell (Reg. No. 52,763) on June 1, 2005.

The application has been amended as follows:

Claims 1 and 4 are to be amended according to the proposed amendment to the claims received May 22, 2006, which has been attached.

Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claim 1 recites, "color constituent separating unit producing discriminating information based on said color separation parameter set by said color constituent extracting unit; document discriminating dictionary unit storing said color separation parameter together with said discriminating information; and a document determination unit comparing for determination document discriminating information produced from image data obtained by reading a document to be discriminated based on said color separation parameter with said discriminating information previously stored in said document discriminating dictionary unit."

Art Unit: 2624

Claim 4 recites, “producing discriminating information for said specified portion from said cut out image data based on said color separation parameter; and storing said color separation parameter together with said discriminating information in a document discriminating dictionary unit; wherein document discriminating information is prepared from image data obtained by reading a document to be discriminated based on said color separation parameter, and wherein said document discriminating information so prepared is compared for determination with said discrimination information previously stored in said document discriminating dictionary unit.”

The above features, as explicitly recited, and in combination with the other elements of the claims is neither disclosed nor suggest by the prior art of record. The closest prior art of record US 5,459,797 to Sato does not teach storing said color separation parameter together with the discriminating information in a document discriminating dictionary and comparing discriminating information obtained from a document to be identified, obtained based on the color separation parameter, with discriminating information previously stored in the document discriminating dictionary. Claim 5 depends from claim 4.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
